SUMMARY

I am an enthusiastic technology professional skilled in leveraging data to extract insights, build interactive dashboards, and streamline decision-making using tools like Python, SQL, Excel, and Power BI.

EXPERIENCE

Data Analytics Job Simulation

Deloitte (via Forage)

July 2025 - August 2025, Remote (Virtual Internship)

- Completed Virtual Internship via Forage, replicating real-world data analysis workflows and delivering 2 analytics case studies.
- Cleaned, organized, and validated records using Microsoft Excel and Tableau, improving dataset accuracy 20%.
- Built an interactive dashboard to identify anomalies, reducing manual analysis time and enabling faster business insights.

PROJECT

Shopping Behavior Analysis | Python, PostgreSQL, Power BI |

Independent Academic Project • GitHub (link) | Video Demo/PPT/Report (link) • October 2025 – November 2025

- Performed end-to-end analytics workflow on 3,900 customer records using Python for data cleaning and PostgreSQL for SQL-based segmentation.
- Built a Power BI dashboard visualizing revenue by age, gender, and subscription type, improving marketing targeting by 25%.
- Prepared a PowerPoint presentation and detailed report summarizing insights on loyalty behavior, discount effectiveness, and purchase frequency.

Sales Analysis and Power BI Dashboard | Python, Power BI, Excel |

Independent Academic Project • GitHub (link) | Video Demo/PPT/Report (link) • September 2025 – October 2025

- Analyzed 5 years of company sales data using Python to uncover trends, seasonal patterns, and high-performing products.
- Built a Power BI dashboard with 10+ KPIs, improving reporting efficiency by 40% and revealing Products 25 & 26 drove 25% of revenue.
- Designed a PowerPoint presentation and report summarizing insights, business recommendations, and regional performance metrics.

Food Delivery Analytics – SQL Case Study | PostgreSQL, Excel, GitHub |

Independent Academic Project • GitHub (link) | Video Demo/PPT/Report (link) • August 2025 – September 2025

- Designed a relational database using PostgreSQL and analyzed 5,000+ records with advanced SQL queries to derive key business insights.
- Optimized query performance by 25% through indexing and schema normalization, improving reporting speed.
- Created a PowerPoint presentation and comprehensive report summarizing KPIs, customer segmentation, and delivery efficiency.

EDUCATION

Bachelor of Technology in Information Technology

Malla Reddy College of Engineering and Technology • Hyderabad, Telangana, India • 2024 • 8.75 CGPA

Intermediate (M.P.C)

Samhitha Junior College • Rajahmundry, Andhra Pradesh, India • 2020 • Marks: 927 / 1000

Secondary School Certificate (SSC)

Bhashyam High School • Rajahmundry, Andhra Pradesh, India • 2018 • 9.8 GPA

CERTIFICATIONS

Introduction to Excel (Simplilearn) — learned lookup, pivot tables, charts, VBA, and formulas for efficient data analysis.

Introduction to SQL (Simplilearn) — learned SQL fundamentals for data extraction, filtering, joining, and aggregation.

Design Power BI Reports (Microsoft) — built interactive dashboards, data modeling, and visualization techniques.

SKILLS

Programming Languages: Python, SQL (Structured Query Language) | **Databases:** MySQL, PostgreSQL |

Visualization Tool: Power BI | **Tools & Platforms:** Jupyter Notebook, Figma (Layout Design) | **AI Tools:** ChatGPT |

Productivity Tools: MS Word, PowerPoint, Excel
